

Planet Protector I.D. Badges & Division into Three Groups

The Planet Protector I.D. Badge template on the next page of this document.

Participants should write their own name under the “Planet Protector I.D.” text, and color the badge. Once completed, all badges should be backed with cardstock paper and attached to string so they can hand around the participants’ necks as a name tag.

Badges should be colour coded for the cardstock so as to identify which group the student is in. Participants should be divided into three groups before the trip based on the teacher’s discretion to enable balanced groups that work together well.
